PRESENTED BY TYRIN BARNEY

THE CENTRAMIND BLUEPRINT

The exact setup I use to run my company with an AI that never forgets.

Ty

EDITION 1.0.0

THE THREE PILLARS

YOUR TOOLKIT

Three free tools. No subscriptions. No upsells. Together, they give your AI a brain, a memory, and a body.

Claude

THE MIND

Claude is the AI itself. Smart, patient, a real teammate. Made by Anthropic.

THE MEMORY

Supabase is where every thought your AI has gets saved, safely and for free.

THE BLUEPRINT

GitHub holds the code. Download it once. Never touch it again unless you want to.

THE CENTRAMIND BLUEPRINT

Welcome in.

What you're about to go through isn't a technical setup. It's a conversation.

In about fifteen minutes, I'm going to ask you a handful of questions about your business, your time, and the work that eats your week. When we're done, you'll walk away with a plan that tells you exactly what an AI operating system for your business should look like, what it should do first, and how much time and money it could save you.

That plan is called your Blueprint.

You don't need to know any tech. You don't need to install anything. You just need to answer honestly.

Let's walk through what's coming.

What CentraMind Actually Is

Before you start, it helps to know the vocabulary. There are three pieces that work together, and people confuse them all the time.

CentraMind is the AI operating system I built for my own company. It's what lets me run a one-person business with an AI teammate that never forgets me, never loses context, and picks up every morning exactly where we left off.

The Blueprint is the questionnaire you're about to take. It's not the system. It's the plan for your version of the system. Think of it like meeting with an architect before you build a house. You don't get walls yet. You get drawings, a materials list, and a realistic timeline. That's your Blueprint.

The Build is what happens next. Once you have your Blueprint, you decide how you want your CentraMind to come to life. You can build it yourself with the free starter kit, or you can have me and my team build it for you. Either way works.

Simple, in order:

> *You take the Blueprint. The Blueprint tells you what your CentraMind needs to be. Then you build your CentraMind.*

Before You Start The Questionnaire

Grab a notebook. Or a coffee. Or both.

The questionnaire lives in your browser. You don't download anything. You don't install anything. You just go to:

> ***blueprint.tyrinbarney.com***

When you land there, you'll be asked for your email. That's so I can send your completed Blueprint to you as a keepsake (and so I can let you know when new tools and walkthroughs drop). I don't sell your email. I don't spam you. I send you things worth reading.

Now let me tell you what you're about to be asked.

The Five Steps Of The Questionnaire

Step One. Your Process Audit

I'm going to show you a menu of everyday business activities. Writing emails. Scheduling. Client intake. Social media. Invoicing. Customer support. Content creation. Meeting notes.

You'll check the boxes for the ones that apply to you. Don't overthink it. If you spend real hours on it every week, check it.

This tells me what your business actually does, not what you wish it did.

Step Two. Your AI Mapping

For every process you checked, I'll suggest which AI tools are best suited to handle that type of work. You'll confirm or adjust each one.

This is the "which muscles does your AI need" step. Every business is different. Some of you need an AI that mostly writes. Others need one that mostly plans. Some need one that handles customer questions.

Step Three. Your Architecture

I'll ask you to pick a size. There are three:

Solo Operator. You're a one-person or two-person shop. You want an AI teammate that feels like a brilliant assistant. Most people are here.

Team Fleet. You have a small team. You want multiple AI operators, each specialized, coordinating with each other. This is what I run at Eternium.

Enterprise Grid. You're a bigger company. You need multiple departments to each have their own AI fleet, with reporting and access controls across the whole thing.

Pick the one that sounds like you today, not the one you aspire to in three years. We can always scale up.

Step Four. Your ROI

I'll ask three numbers:

1. How many hours per week does your team spend on repetitive work?
2. What's your hourly rate (or average team rate)?
3. How many people are on your team?

From those, I can show you what this is worth to you. In hours saved per week, and in dollars saved per year. Both numbers will surprise you.

Step Five. Your Blueprint

When you finish, you'll see your personalized plan on screen. It contains:

- A summary of every process your AI will eventually handle
- Your recommended architecture size
- Your projected time and money savings
- A month-by-month roadmap for the first ninety days

That's your Blueprint. You keep it. You reference it every time you make a decision about AI in your business.

What Happens After You Have Your Blueprint

You've got your plan in hand. Now you pick a path.

Path One. Build It Yourself With The Free Starter Kit

I'm releasing a free starter kit called **CentraMind Starter**. It's the bones of the exact system I use, given away under an open-source license. Your Blueprint tells you how to configure it for your specific business. If you're comfortable with a little tinkering (or you have Claude Code installed and can let it drive), this is the path for you.

When the Starter kit is live, you'll get access to it at:

> ***centramind.tyrinbarney.com***

Join the community so you get the announcement the day it drops.

Path Two. Let My Team Build It For You

If you'd rather skip the tinkering, I offer a done-for-you build service called **CentraMind Build**. You hand me your Blueprint. My team and I take it from paper to live system, branded for your company, running on your infrastructure, with your team trained on how to operate it.

If that sounds like the right move, the contact details are at the back of this guide.

Path Three. Stay Close And Learn

Not ready to build anything yet? That's okay. Join the Digital Armory community and watch me run CentraMind in real time. See what works. See what breaks. See how the system evolves. When you're ready to build yours, you'll know what you're doing.

A Few Things To Know Before You Start

Your Blueprint is for you. I don't share it. I don't sell it. I don't hand it to anyone else. It's your private plan.

The questionnaire is free forever. You can retake it as your business changes. Most of my community members redo theirs every quarter.

It takes fifteen minutes. Not fifty. If you're honest about what you do and how you spend your time, you'll fly through it.

There are no wrong answers. This is a mirror, not a test. The more honest you are, the more useful your Blueprint becomes.

Where To Go When You Get Stuck

The questionnaire itself is forgiving, and you can always go back a step. But once you have your Blueprint and you're ready to act on it, here's where to go.

The Digital Armory. This is the private community I run for everyone building their own CentraMind. Real humans answer real questions. Launch updates drop here first.

Join at **tyrinbarney.com/community**

My YouTube channel. Full walkthroughs of my own CentraMind. Real-time rebuilds. The stories of what broke in production and how I fixed it.

Subscribe at **youtube.com/@tyrinbarney**

Talk to me about the done-for-you build. If you're serious about having me and my team put this together for you, start at **tyrinbarney.com/community** and say hello. I read every note.

One Last Thing

The Blueprint is one small piece of a bigger idea. The idea is that every business, at every size, should be able to run with an AI that actually knows them, actually serves them, and never gets lost.

I'm building toward that. Every piece of the puzzle, one open-sourced release at a time.

You taking this questionnaire and sharing what comes out of it is how this grows. Tell me what you got. Tell me what surprised you. Tell me what's still unclear. That feedback shapes the next release.

Now go fill out your Blueprint.
